

Our technological innovations boost the energy market. With our digital expertise and our market know-how we are actively promoting the energy transition. Likron has a stable and sustainable business model with strong growth potential. For about 10 years we have operated in a highly competitive environment. We place particular emphasis on agility and openness in our collaboration.

Would you like to join us in making the energy markets ready for the future? Our international team of around 30 experts is looking for a

Frontend Developer (m/f/d)

Permanent position, full-time · Munich

These tasks await you

- You develop front-end applications for our energy trading services - and will thus be responsible for our appearance towards customers
- You are part of an interdisciplinary team of developers, business analysts and quants and actively contribute your opinion
- You plan new features and search for the optimal solution for customers
- You analyse new technologies and best practices to incorporate them into our setup and thus constantly improve our products

What you need to succeed

- Relevant experience with at least one established JS framework (ReactJS, Angular,...). In the best case in combination with TypeScript
- Good knowledge of typical test frameworks and development tools (Jest, npm, webpack, Nx, Git, ...)
- Experience in the field of design and UX
- Good communication skills and collaboration skills to work effectively in an inter-disciplinary team
- Fluent in English and German

Why you should become part of the LIKRON team

 Innovative company with growth potential

 Attractive salary with profit-sharing

 Creative working environment with great training opportunities

 30 days annual leave

 Flexible working hours and working from home

We are looking forward to your application!

If this sounds interesting to you, please send your application documents to career@likron.de
